---

### Where

at <https://segreteriaonline.unisi.it>

Check the Application required documents below

---

## How

1. Register on the UniSi portal
2. Calculate your temporary Italian Tax code. Click [here](#)
3. Add the information required
4. Upload the documents

See a tutorial [here](#)

---

## Interviews

The interviews will be in December 2022, exclusively online via Zoom or MsTeams.

All candidates will receive a notification with the schedule.

---

## Application required documents

- Passport

- Degree that gives the possibility to have a Post Graduation course (see above Entry requirements)
  - ID size photo
  - European styled Curriculum. Click [here](#) to use our form
- 

## Enrollment required documents

- From this year the University of Siena has established that the Declaration of Value or the CIMEA recognition must be uploaded to the portal (segreteria online) before the start of the courses; for this reason, it's a prerequisite and mandatory for admission to the Master's assessment test to have the original documents in order (degree certificate of College/University/Master certificate).
- The Statement of Comparability\* and the Verification of the Certification\*\* (CIMEA) are accepted as an alternative to the Declaration of Value. It's cost is between 215 and 335 EUR and depends on the country of request. For more information please visit:  
<https://apply.unisi.it/contents/content/22-cimea>
- The cost of CIMEA will be refunded by the Master Program. Please have a receipt of payment and bank account Swift code/BIC and IBAN
- All the Enrollment required documents are mandatory if you pass the selection process.

\*The Comparability service allows you to request the Statement of Comparability with the evaluation of your academic and secondary school qualifications conducted by CIMEA experts.

The Statement of Comparability is a document containing the information relating to the qualification, such as the recognition/accreditation of the institution that issued it in the country of origin and the level of the qualification according to the Bologna Process and the European Qualifications Framework, in addition to the specifications of the comparability of the degree, the nature of the course (academic or professional) and any other useful element to let it be evaluated by the competent bodies in the different national systems.

This comparison does not establish in any way the formal recognition of the qualification within a different national system, but is a useful indication for the institutions that evaluate the qualification during the different recognition procedures: the Statement of Comparability of the qualification has the weight of opinion, and does not bind institutions in any way during their evaluation and recognition procedures.

\*\*The Verification service allows you to request the Statement of Verification which certifies that your qualifications has been awarded by an official body in the education system of reference.

The Statement of Verification is a document showing the main information related to your qualification, as well as the certification of the verification of the authenticity of the qualification performed by CIMEA experts. The term Verification of authenticity means any action performed by CIMEA in order to receive information on the actual award of a qualification by the institution of reference.

This verification does not establish in any way the formal recognition of the qualification within a different national system, but is a useful indication for the institutions that evaluate the qualification during the different recognition procedures: the Statement of Verification of the qualification has the weight of opinion, and does not bind institutions in any way during their evaluation and recognition procedures.
